

Schedule 2

Indicative list of textile finishing processes

(Chapter notes to Chapters 50, 52, 53, 54, 55 and 58)

antibacterial finish	dressing (lace)	pre-sensitization
antisoil finish	dry beating	pre-shrunk
antistatic agent	embossing	pressure decatizing
backtanning	embrittled	proofing
baking/thermofixation	emerizing	relaxing
baulk finish	filling	rigging
beating (finishing)	fixing	schreiner
beetled finish	flame retardant treatment	setting
biopolishing	fluorochemical finishing	shrink-resistant
bleaching	foam finishing	silicone finish
blown finish	friction calendering	simili mercerizing
boiling off/degumming	fulling	singeing
bottoming	gigging	soaping
brushing	glazing	softening
causticizing	grass bleaching/grassing/crofting	soil release finish
clear finish	loading	solvent scouring
compressive shrinking	London shrinking	sour
conditioning	mercerization (hot/post/slack)	stabilized finish
crabbing	milling	stainblocker
cramping	mordanted	stiffened
crease-resist finish	napping/friezé	stitch finish
crêping	padding/slop padding/nip padding	stripping
curing/flash-curing/moist curing	parchmentizing	sueding
cuttling	plaiting	water-repellent
decatizing/decatizing	polishing	wet fixation
delustring	potting	Wigan finish
desizing	precrêping
